

# DoD & DoR

## **1-Definition of Done:**

1. Code is pushed on GitHub.
2. No issues exist in code.
3. Code is tested (unit testing, security testing...).
4. Code is reviewed.
5. Code can run on the desired platforms.
6. No bugs.

## **2-Definition of Ready:**

1. Product owner provides a clear definition of user story that is in the form 'As a user, I want to do something so that something'.
2. Product owner should provide a priority for each user story.
3. Product owner should provide which epic and sprint includes each user story.
4. If there is some sort of dependency or conflict between user stories, he/she should provide this information.
